INFOSHARE SYSTEMS

Cybersecurity Maturity Model Certification (CMMC 2.0)

A simple guide to CMMC 2.0 compliance and how Infoshare Systems makes a difference

Infoshare Systems:
Your One-Stop Solution for CMMC Compliance

Don't let a delayed CMMC 2.0 assessment, lack of a comprehensive cybersecurity strategy, or inadequate documentation policies stand between you and a lucrative DoD contract. With Infoshare Systems as your reliable guide, you can rest assured that we'll work towards your success and provide the services you need to achieve perfection at every stage.

From pre-assessment to compliance maintenance, we're with you every step of the way. As your advisors, we'll help you set the context for compliance and ensure all necessary controls and practices are in place. When you choose our services, you'll have complex real-time data and actionable insights at your fingertips, giving you a sense of security and control.

What is the CMMC 2.0 Framework, and where do you stand?

Understanding the Cybersecurity Maturity Model Certification (CMMC) 2.0 framework and determining the CMMC level is crucial to compliance. The DoD designed it as a three-level cybersecurity requirement to ensure that sensitive information is protected, the cybersecurity of companies within the Defence Industrial Base (DIB) is enhanced to defeat evolving threats continuously, and accountability is improved ultimately reducing barriers to comply with DoD requirements.

Level 2 compliance is mandatory for organizations handling controlled unclassified information (CUI). This Advanced level involves engineering drawings, export-controlled data, and other sensitive DoD data.

LEVEL 3 Expert — **110+** Practices based on NIST SP 800-172. Triennial government-led assesments

LEVEL 2 Advanced — **110** Practices aligned with NIST SP 800-171. Triennial third-party assesments for critical national security information; Annual self-assesment for select programs

LEVEL 1 Foundational — **17** Practices. Annual self-assesment

We stand out in the crowd of service providers with:

- Cybersecurity specialists who spot gaps, identify vulnerabilities before they arise, and streamline remediation cost-effectively and on time.
- In-depth industry expertise tailored to specific organizational needs, leading to stress-free certification.
- Customized compliance roadmaps that help maintain certification despite evolving organizations.
- Threat-mitigation strategies that provide actionable insights to strengthen defense against cyber threats.
- Technology that optimizes resource utilization reduces manual effort, quickens issue resolution, and provides real-time monitoring.

Strategic partnerships leading to world-class solutions

Infoshare Systems has partnered with three global leaders to provide the best implementation technology, assessment readiness evaluation, and certification services in your CMMC journey - IBM, Gray Analytics, and Arrow Electronics.

IBM Silver Partner	Gray Analytics	ARROW

✅ Phase 1

With IBM's unmatched security tools, Infoshare Systems implements superior security against current and future risks. IBM ensures data security by automating discovery, monitoring, and attacking AI and cryptographic vulnerabilities through its toolset.

Our collaboration with IBM aims to provide a security-first approach to data usage, storage, and exchange. Not just data, we combine our expertise to protect AI models and hybrid cloud environments of all those who choose us.

IBM's transformative tools are brought together and distributed for implementation by a global technology provider – Arrow Electronics.

✅ Phase 2

Infoshare Systems investigates pre-assessment readiness with expert-driven advisory services. Our efficient team of cybersecurity specialists identifies gaps, streamlines remediation, and makes organizations audit-ready in a timely and cost-effective manner. Focusing on risk reduction, Infoshare Systems ensures a stress-free CMMC compliance process. We enhance the security posture after identifying the protected assets and those at risk. Our experts work on validating an organization's controls and their effectiveness as an essential step toward assured certification. We also support organizations with compliance documentation review and ensure they meet audit expectations.

✅ Phase 3

Infoshare Systems has partnered with Gray Analytics, an authorized C3PAO, to deliver its clients excellence in assessment and examination services. Based on Infoshare Systems' pre-assessment readiness analysis, Gray Analytics understands an organization's readiness for assessment and the current state of its cybersecurity assets. This understanding helps the C3PAO create a Plan of Action and Milestones (POA&M) to ensure success in achieving CMMC 2.0 certification. Gray Analytics documents the organization's cybersecurity operations in this phase and executes the POA&M as required.

✅ Phase 4

Knowing that CMMC 2.0 compliance is not a one-time thing, Infoshare Systems and IBM combine their strengths again in this phase to bring you the best outcomes. Infoshare Systems conducts periodic ongoing compliance assessments. It ensures an organization's eligibility for certification with proactive vulnerability identification, automated compliance tracking, cost-effective compliance management, expert advisory, and training. It succeeds in Phase 4 with IBM's cybersecurity solutions for data, mobile, and mainframe security, identity and access management, threat detection and response, and fraud protection.

Open Doors To Top-Tier CMMC Solutions

If you want quick and accurate CMMC 2.0 compliance, look no further! Infoshare Systems is all you need. Our expertise and solution-driven approach ensure that no stone remains unturned in your compliance. We will pick you up from any point of your CMMC journey and take you closer to becoming a reliable DoD contractor or subcontractor. We are set on a mission to make CMMC 2.0 compliance achievable, affordable, and efficient for all our clients.

The Perfect Partner You Need

Breaking down the complexity of CMMC 2.0 compliance is not easy. It takes experience and expertise to ensure that organizations are compliant. At Infoshare Systems, we have many qualities to make a winning difference. We prioritize efficiency in the pre-and post-assessment stages to reduce the risk of contract loss and its financial burden. Our skilled and trained cybersecurity professionals are our pillars of strength, and they offer supremacy in knowledge and technological expertise.

Our services have reached many clients within the public and private sectors as the differentiator between achieving and losing DoD contracts. We have designed a wide range of solutions that are customizable to meet every client's unique needs. Be it assessing gaps, discovering CUI, or System Security Plan (SSP) and POA&M optimization, we've got you covered.

01

End-to-End Support
We help overcome challenges related to addressing gaps and evaluating the SSP.

02

Industry Expertise
Our experienced cybersecurity experts help deliver the best results in the process.

03

Proven Methods & Processes
Our methods are transparent and designed for quick issue resolution.

04

Transformative Partnerships
We have partnered with global leaders to deliver excellence at every stage.

Factors that set us apart in reducing the risk of assessment failure

About Us

Infoshare Systems is a trusted cybersecurity and IT solutions provider with a decade of cybersecurity experience that makes a valuable difference to organizations. We have delivered consistent excellence in safeguarding and governing sensitive data. Our industry-proven methodologies protect information, detect threats, and resolve cybersecurity issues promptly and efficiently. We offer various cybersecurity services, including enterprise risk management, cybersecurity advisory, and technical professional services, to help businesses safeguard their brands.
